

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended): An oil suspension concentrate, comprising

- a) one or more herbicidally active compounds from the group of the sulfonamides in suspended form,
- b) one or more safeners,
- c) one or more organic solvents, ~~and~~
- d) one or more sulfosuccinates and
- f) one or more customary auxiliaries and additives.

Claim 2 (Previously presented): The oil suspension concentrate as claimed in claim 1 which comprises, as component a), one or more herbicidally active compounds from the group consisting of the phenylsulfonamides and the heteroarylsulfonamides.

Claim 3 (Previously presented): The oil suspension concentrate as claimed in claim 1 which comprises, as component b), one or more safeners from the group consisting of dichlorophenylpyrazoline-3-carboxylic acid and its esters, 5,5-diphenyl-2-isoxazoline-3-carboxylic acid its esters and 8-quinolineoxyacetic acid and its esters.

Claim 4 (Previously presented): The oil suspension concentrate as claimed in claim 1, which comprises, as component c), one or more solvents from the group consisting of unsubstituted or substituted hydrocarbons, aprotic polar solvents and fatty acid esters.

Claim 5 (Previously presented): The oil suspension concentrate as claimed in claim 1, which comprises, as component d), one or more sulfosuccinates from the group of the mono- and diesters of sulfosuccinic acid.

Claim 6 (Currently amended): The oil suspension concentrate as claimed in claim 1, which additionally comprises e) one or more agrochemically active compounds different from a) and b) and/or f) ~~customary auxiliaries and additives~~.

Claim 7 (Previously presented): A process for preparing an oil suspension concentrate as claimed in claim 1, which comprises mixing and, if appropriate, grinding the components.

Claim 8 (Previously presented): A method for controlling harmful plants, which comprises applying an effective amount of an oil suspension concentrate as claimed in claim 1, to the harmful plants, to parts of the plants, to plant seeds and/or to the area on which the plants grow.

Claim 9 (Previously presented): A method of using the oil suspension concentrate as claimed in claim 1, for controlling harmful plants, wherein the oil suspension concentrate is applied to the harmful plants.

Claim 10 (Previously presented): A method of using the oil suspension concentrate as claimed in claim 1, wherein the oil suspension concentrate is mixed with at least one other substance to create a herbicidal composition.

Claim 11 (Previously presented): The method as claimed in claim 10 wherein the herbicidal composition is a suspension, an emulsion, a suspoemulsion or a solution.

Claim 12 (Previously presented): A herbicidal composition, comprising an oil suspension concentrate as claimed in claim 1.

Claim 13 (Original): A method for controlling harmful plants which comprises applying an effective amount of a herbicidal composition as claimed in claim 12 to the harmful plants, to parts of the plants, to plant seeds and/or to the area on which the plants grow.

Claim 14 (Previously presented): A method of using the herbicidal composition as claimed in claim 12, for controlling harmful plants, wherein the herbicidal composition is applied to the harmful plants.

Claim 15 (Previously presented): The oil suspension concentrate as claimed in claim 2, wherein said phenylsulfonamides are selected from the group consisting of phenylsulfonylamino-carbonyl-triazolinones and phenylsulfonylureas.

Claim 16 (Previously presented): The oil suspension concentrate as claimed in claim 2, wherein said heteroarylsulfonamides are selected from the group consisting of heteroarylsulfonylamino-carbonyl-triazolinones and heteroarylsulfonylureas.
